The Promise of Sustainability

Sustainability is at the heart of DIACO Star Trading's business practices. Playing an integral role in our business strategy and embedded in our day-to-day operations. We are building on our experience and leveraging our expertise to develop a more responsible business. We strive to conserve natural resources by minimizing the environmental impact of our operation. Our team is aware of the responsibility we have towards the Environment and the next generations. We will understand the responsibility we have to contribute to the global effort to minimize the environmental impact of our operation. As such, we have targeted decarbonizing as our operational footprint. Below are some of our in-hand or planned-to-implement initiatives:

- **Net-zero emissions:** We invest and strive to become a net-zero emissions energy and this important matter remains at the heart of our strategy. We also have made progress in supporting our customers in reducing their emissions, with further investments in wind, solar, biofuels, hydrogen, electric vehicle charging, carbon capture and storage, and nature-based solutions.
- **Spills and spills prevention:** Our team is well-trained to prevent/minimize spills of Hydrocarbons.
- **Minimizing/preventing evaporation:** In every stage of operation, our workforce is carefully monitoring and avoiding any potential evaporation of the oil they are handling. In other words, we strive to conserve natural resources by Minimizing the environmental impact of our operation.
- **Supporting Global efforts to minimize Environmental impact:** Our team is aware of our responsibility to contribute to the global effort to minimize the environmental impact of our operation. We have targeted decarbonizing our operational footprint.
- **Selection of partners:** For the accomplishment of our targets and mandates in delivering Energy to our customers, we only select partners who care for the Environment and exceed the expectations to minimize the footprint of the operation.
